

COVID-19 Corporate Policies

CORNERSTONE MANAGING PARTNERS

The health and safety of our colleagues, clients, and community partners have been and continue to be our highest priority. As we continue to monitor the Coronavirus (COVID-19) pandemic, we wanted to share updates on the actions we are taking in response to this evolving situation.

The Following Measures Will Take Effect Immediately Across All Projects and Locations:

1. Sick employees and subcontractors are required to stay home
2. Employees who show signs of sickness in the workplace will be sent home
3. Encourage employees to wash their hands more frequently throughout the day
4. Encourage the use of hand sanitizer and other disinfecting products more frequently daily
5. Employees are to wear gloves during work when able based on the scope of work
6. All non-essential meetings will take place via virtual meeting
7. All employees and subcontractors are asked not to come into close contact with any residents or employees of the Association

How You and Others Can Help:

1. We strongly encourage you to continue to follow guidance from your local health authorities, along with the World Health Organization (WHO)
2. Stay home if you feel ill
3. If you or anyone in your organization has a confirmed case of Coronavirus, or come in direct contact with an individual who has a confirmed case of Coronavirus, please notify our management team immediately

Containing the spread of the Coronavirus is a team effort, and we ask that each of you do what you can to protect each other as well as the broader community. If you have any outstanding questions, please reach out to our team directly. CMP will be updating the policy as recommendations from the CDC and/or local health authorities change.
