HARBOR CLUB – CONSTRUCTION AND SCHEDULE UPDATE

West Tower Construction Update

Dear Resident,

We regret to inform you that CMP received notification last week of a delay in the manufacturing of the heat exchangers crucial for the domestic hot-water supply system. Confirmation of the remaining heat exchangers is anticipated by Monday, April 1st. Once these components arrive onsite, CMP will promptly release an updated construction schedule. It is important to note that the delay is expected to endure for approximately two (2) weeks before construction activities can commence within units. We extend our sincere apologies for any inconvenience this may cause and wish to reassure you that we are diligently working to address this issue and mitigate any disruption to your plans.

We kindly request that you adjust your schedules accordingly, as any previous construction timelines will now be revised. Your understanding and cooperation during this period are greatly valued as we navigate through this challenge. We sincerely appreciate everyone's continued support and patience as we work towards the restoration of your plumbing systems.

Respectfully,
Greyson Connelly
Vice President
Cornerstone Managing Partners
